

Sergiu Mare

Front End Developer

PROFILE

I am proactive with a problem solver attitude, self-motivated to learn new technologies and techniques. I have a critical eye for design and a real passion for clean code. Professionally driven with the ability to work under pressure on multiple concurrent projects and deliver quality work to deadlines. Able to analytically solve problems, keep ahead with current best practices and quickly learn new skills. An effective team member with excellent technical and communicative skills, I can bring an enthusiastic approach to any working environment.

SKILLS

HTML5, CSS3, PostCss, SCSS, Javascript ES6, ES7, OOP, Jquery, Jquery UI, Ajax, JSON, Rest API, HandleBars, React, React Router, Redux, Vue, Vuex, Vue Router, Nuxt.js, Node.js, Express.js, NPM, MongoDB, Webpack, GIT, Azure Dev, Firebase, Heroku, Jest, Puppeteer, Photoshop, VisualStudio, UX

LANGUAGE

- English: Fluent
- Italian: Medium
- French: Beginner

Senior Front End Developer | 09/2020 - present | Deloitte

<https://www2.deloitte.com/global/en.html>

NSH DIGITAL: On this project I was part of the Front End Dev team. I was directly responsible of building pixel perfect interface, based on design, writing tests, code review and offering support when it's needed. The application is using the Vue ecosystem, Vue.js, Vuex and Vue router. The infrastructure is AWS and AZURE, and the back end is using Node.js

Front End Developer | 04/2019 - 07/2020 | Fed by Abel & Cole

<https://fedteam.co.uk/>

On this project I was the only Front End Dev. I was directly responsible for the UI side, taking the design and bringing it to the perfect pixel level. I was also directly responsible for the implementation and use of all front-end libraries.

We helped this company increase the security of the code by implementing coding standards and testing the code on the front end.

The web solution was hybrid. The back-end is made in .NET and the interface in Vue.js. The solution relied heavily on the REST API, this being the main way to communicate with the server. The solution was connected to Umbraco to serve the need for CMS.

Together with the team we work in sprints for 2 weeks.

We work very closely with the UX designer to prevent errors and increase reusability.

Front End Developer | 04/2018 - 04/2019 | Resolute Asset Management

<https://www.resoluteassetmanagement.com>

Taking all the experience from Codehouse I entered Resolute as a Front End Dev where I had full responsibility for this aspect. Due to the fact that I was the only front-end dev I was directly responsible for implementing the design, bringing it to a perfect pixel level, and choosing the libraries to be used in production on the front-end side. To bring our internal projects to life we used Firebase as a back-end engine and React on the front-end.

Junior Front End Dev | 01/2017 - 04/2018 | Codehouse

<https://www.codehousegroup.com/>

This is the point where I entered the web development market. This environment gave me the opportunity to learn all the best practices and also to use them in production.

I became an expert at writing HTML5, CSS3 and Jquery, and thus I influenced the production by shortening its time. I managed to integrate in all the teams I was part of and in short time I became totally independent.

Hospitality Assistant | 01/2014 - 012/2016 | Hotel Industry

Account Manager | 01/2012 - 08/2013 | Romstal Imex

Corporal | 01/2009 - 07/2011 | MOD

EDUCATION

JustIT | 04/2016 - 08/2017 | Web development course

Languages: HTML5, Vanilla JavaScript, Jquery, CSS3, Bootstrap, API's, GIT, Gulp, Photoshop.

Free source: W3schools.com, Linda.com, Codecademy, PluralSight.

University Babes Bolyai | 10/2007 - 06/2011 | Finance & Banks

Code modules: Finance, Management, Business Analysis, Accountancy. Final Year Project: "Financial economic al analysis of Rompetrol.LTD"
